

KUNTRAPAKU MOUNISH KUMAR

Bangalore, Karnataka | +91 9391431325 | k.mounishkumar17@gmail.com

CAREER OBJECTIVE

Motivated and detail-oriented Information Science Engineering student seeking an opportunity to apply technical knowledge in Python, SQL, AI, data handling, and production support. Eager to learn cloud technologies and DevOps practices and contribute to operational excellence in a fast-paced environment.

EDUCATION

Cambridge Institute of Technology, Bangalore

2023 – Present

Bachelor of Engineering – Information Science and Engineering | *Currently in 4th Year* | CGPA : 8.33

Course work: Database Management Systems (DBMS), Computer Network, Full Stack Development, Principles of Data Science, Artificial Intelligence, Data Structures and Algorithms (DSA), Design and Analysis of Algorithms, Microprocessors and Microcontrollers, Operating Systems, Introduction to Python, Internet of Things (IoT), Agentic AI.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Web Technologies: HTML5, CSS3, Node.js, Express.js, EJS

AI Technologies: LangChain, LangGraph, RAG, Output Parsers

Databases: SQLite, MySQL (Basics)

Tools & Platforms: Git, VS Code, Linux Basics, NPM

Concepts: Data Processing, CRUD Operations, API Basics, Debugging, Agile Methodology

Soft Skills: Problem Solving, Team Collaboration, Communication, Analytical Thinking

ACADEMIC PROJECT

- **SehatCare App (Offline AI-Powered Smart Healthcare Application)**
(Currently deployed in playstore for testing phase)
 - Developed a healthcare management application integrated with an AI-powered chatbot that responds to user health-related queries, providing instant assistance through a centralized and user-friendly platform.
 - Fine-tuned the Gemma LLM using healthcare datasets from Hugging Face and integrated it as an AI-powered chatbot to provide healthcare assistance and answer user queries.
 - Developed and trained the Gemma-based healthcare AI model capable of running offline, providing secure and accessible healthcare assistance without internet dependency.
 - This application has 20+ integrated features, including symptom analysis, multilingual AI chat & voice assistant, prescription OCR, medicine reminders, health/vital tracking, vaccination management, first aid, emergency support, family profiles, wellness check-ins, and offline on-device AI.
- **MedAI-AI Medical Assistant**
 - Developed MedAI, an AI-powered medical assistant using Next.js, NestJS, FastAPI, and PostgreSQL to provide intelligent healthcare support.
 - Implemented Retrieval-Augmented Generation (RAG) using LangChain and LLMs for accurate medical document question answering and contextual responses.
- **Student Task Management App**
 - Built a Student Task Management System for creating, organizing, and tracking academic tasks and deadlines.
 - Implemented automated date- and time-based notifications to remind users of upcoming tasks and events.
 - Developed an intuitive interface with task scheduling and progress-tracking capabilities to enhance student productivity.

- **Bus Reservation System**

- Built a Bus Reservation System enabling users to search buses, reserve seats, and manage bookings efficiently.
- Implemented authentication, seat allocation, fare calculation, and booking management functionalities.
- Developed a database-backed solution for secure handling of schedules, passenger information, and reservation records.

CERTIFICATIONS

- Programming Data Structures and Algorithms using Python, **NPTEL**
- Agentic AI Course Completion Certificate, **By Edureka**

STRENGTHS

- Quick learner with strong analytical and problem-solving skills
- Good communication
- Passionate about Data Engineering, production support, and operational excellence
- Highly adaptable to fast-paced and technology-driven learning environments
